Techniques

Gauge

Please see 'Heart House' pattern/gauge motif.

Magic Ring

Magic rings are great because they do not leave a hole in the middle of your project. When using this method it is extremely important that you work your initial yarn end away very well. If it comes undone your whole project might unravel (**see Working Away Yarn Ends below**).

Place the end of the yarn in your left palm (**right if you are left-handed**) and hold it in place with your pinkie and ring finger. Wrap the yarn clockwise around your forefinger so that the working yarn crosses over the yarn end and forms a loop. Remove the loop from your finger and hold it by pinching the point where the two strands of yarn overlap.

Insert your hook into the loop, catch the working yarn with your hook and pull it through the loop. Yarn over and make a chain stitch. This chain secures your working yarn. Following the pattern, work the remainder of the round into the magic ring, remembering to work over the initial yarn end as well. When the round is complete, close the hole by pulling on the initial yarn end!

Stitch Anatomy

Stitches consist of posts (**the bits that go into the stitches of the previous round**) and loops (**the horizontal 'V's formed by the tops of the stitches**). Before you start with this pattern, it is vitally important that you know which 'loops' belong to which stitch or 'post', and vice versa.

When working with the right side (RS) of the last round facing you, the loops for each stitch can be found to the **right** of the post for that stitch (**left** if you are left-handed).

When working with the wrong side (WS) of the last round facing you, the loops for each

stitch can be found to the **left** of the post for that stitch (**right** if you are left-handed).

Corners and the Elusive Hidden Stitch

When working in the round, your corners will be formed by working a number of stitches into the corner st/sp of the previous round. When you've made more than one stitch into that corner sp (or any other chain sp), the loops for the first stitch after the corner (or chain sp) can sometimes be hidden.

If you miss this first stitch, your stitch count will be out every single time, no matter how many times you frog and re-do. Sometimes the first stitch after a chain space is NOT hidden, but clearly visible. Even so, I will refer to it as a '**hidden stitch**', just to remind you to pause and check that you are not accidentally skipping it.

Sometimes you will need to push the stitches out of the way to get into that first stitch. **It is worth noting that an htr directly after any chain sp is the most tricky stitch to get into. It is ALSO worth noting that the hidden stitch won't be nearly as hidden if the WS is facing you.**

Using Stitch Markers

Occasionally, I will tell you to mark specific stitches with a SM. This will either be to help you count (**in which case you can remove the marker after you have counted your stitches**), or to help you identify a stitch in later rounds (**in which case you should leave the SM until it has served its purpose**). To mark a stitch, insert your SM through both loops of the indicated stitch (or into the indicated space). If you need help identifying which loops belong to which stitch, see **Stitch Anatomy** above.

If you do not have stitch markers (or you don't have enough), you can use a piece of scrap yarn to mark your work. I often do!

Standing Stitches

Standing stitches are used to start the round when using a new colour (or starting in a different place from where you finished the previous round). They are exactly the same as regular stitches, except that they are made 'in air', without being attached to a previous stitch. With a sl knot already on your hook, and holding the knot in place with your index finger, make your stitch as normal.

Post Stitches

Front Post Stitches

Identify the post of the stitch you want to work around. Insert your hook from the front to the back and then from the back to the front around the post of the stitch so that the post lies on top of your hook. Complete your stitch as normal.

Back Post Stitches

Back post stitches are a bit trickier than front post stitches, but once you get the hang of them you will love them!

Identify the post of the stitch you want to work around. Insert your hook from the back to

the front and then from the front to the back around the post of the stitch so that the post lies behind your hook. Complete your stitch as normal. **You might find it easier to twist your work forward so that you can see what you are doing.**

Omitting

At the end of most rounds, you will see an instruction telling you to omit the last corner/stitch(es) of the last repeat. This means that your last repeat should stop before the indicated corner/stitch(es), because you will already have made that corner/stitch(es) before the repeat started.

Changing Colours

You can use this method to join a new colour, or a new ball of yarn, in the middle of a round. If you want to make certain elements of the pattern in a different colour, for example, this is how you would switch between colours in a round.

You will need to change your colour on the last yarn-over of the last stitch before the colour change. In other words, stop when you have 2 loops left on your hook. Let go of the old colour/yarn and pick up the new colour/yarn. Draw the new colour/yarn through both loops to complete the stitch and continue as normal.

Joining at the End of a Round/Row

To join your round with a sl st, insert your hook into the indicated stitch/space and make a sl st. If you are instructed to join to the top of the beg chain, make sure that you don't accidentally insert your hook into the top of the first stitch after the beg chain.

Making a sl st join like this adds an extra 'loop', so when you count your sts, it will appear as if you have one too many. When making the next round, work into the stitch/chain that contains the sl st (in other words, the first st of the round). Do NOT work into the back end of the sl st join. It does not count as a st.

Alternatively, you can use the [Invisible Join](#). You can ONLY use the invisible join if you are fastening off at the end of a round/swapping colours for the next round.

Fastening Off

If you are using a sl st join, cut your yarn about 10cm/4" away from your work (after completing the sl st) and pull the yarn all the way through the st. Work away your yarn ends (see [Working Away Yarn Ends](#) below).

Tip: Often, I will make a cheeky ch-1 before fastening off, pulling this ch-1 tight to form a little knot.

Working Away Yarn Ends

Unfortunately, your project is never complete until you have gotten rid of all the "loose ends". A pattern will usually tell you to work away your yarn ends when you are done, but I suggest working your ends away as you go. To do that you will need a blunt tapestry needle and a pair of scissors.

Thread the tapestry needle with the yarn end. Working on the wrong side of the fabric, thread your needle through at least 2.5cm/1" of stitches. **Please note that the wrong side of your project is not necessarily the wrong side of the last row/round made!**

If you are working away your initial yarn end, thread it through at least half of the stitches made into the magic ring.

Pull the yarn through all the way. Working in the opposite direction and **skipping the first stitch**, insert your needle back into the same stitches again. **Skipping the first stitch is essential because it gives the yarn something to grip on to.** Pull the yarn through again. **You can repeat this one more time if you want to make absolutely sure that your yarn ends won't work themselves loose.**

Cut the yarn close to your work, being careful not to accidentally cut one of your stitches. If you have done this neatly, your tails won't be visible on the front of your work.

Blocking

You don't HAVE to block your motifs and/or blanket if you don't want to, but I always find that a good blocking makes for a great presentation. This pattern contains a mix of solid and lace parts, so blocking it will help those parts 'open up' and Bloom, if you will allow me the pun.

I prefer to block my motifs before joining, so that I can gauge whether or not my join is too tight. This pattern allows for that by suggesting that you use a larger hook for your joining, so if you don't want to block, don't block.

If you ARE going to block, immerse your motifs/blanket in water for a couple of minutes. Gently wring out most of the excess water. Place your work between two large towels and roll up like a big cigar so that the towels absorb more of the water. Unroll again and place your work on your blocking surface. Applying gentle pressure, stretch your work out and use pins to pin it to your blocking surface. Try to avoid creating 'pointy bits' when you pin it down. I use a pin every inch or so.

Alternatively, you can use a steamer and gently stretch the blanket into shape as you go.

Gauge motif – Heart House (Cabin in the Woods)

These Heart Houses will form the corners of your blanket, and because I find them super cute, I decided to use them as the gauge motif. Not only are they an accurate predictor of gauge, they also offer an opportunity to see how your colours play together. I think this will be very helpful for those of you who are still deciding on which colours to use.

Because we will be using them when we create the corners in Part 11, you **will need to make four of these motifs**, but you don't have to do that right now – unless you want to!

Let the fun begin!!!

Round 13

From this point on, I have broken the instructions up so that it is easier to count stitches and keep track of where you are. This round will have a fair few landmarks, but it is much easier to stop and check than to frog this round!!! In fact, my original note (to myself) said: "This is tedious counting! Put in landmarks".

First Corner: Join your yarn by making a standing Popcorn in the marked ch-1 sp from the previous round. Ch 3, make a Popcorn in the next ch-2 sp. **Go ahead and mark the ch-3 sp with an SM before you continue**. Ch 3, make a Popcorn in the next ch-1 sp.

First Side: (Ch 3, make a Popcorn in the next V-st) **9** times. **Before you continue, go ahead and count your Popcorns. There should be 11 Popcorns after the SM, including 2 of the corner Popcorns.**

Fourth Side: Make a Popcorn in the next V-st. (Ch 3, make a Popcorn in the next V-st) 7 times. **Check that you have 8 Popcorns on this side.**

Fifth Corner: [Ch 1, dtr, ch 1, dtr, ch 1] between the last tr of the same V-st and the first tr of the next V-st.

Fifth Side: Make a Popcorn in the next V-st. (Ch 3, make a Popcorn in the next V-st) 8 times. Ch 3, join to the first Popcorn with a sl st. **Check that you have 10 Popcorns between the last corner and the SM.** Fasten off and work away your ends.

Stitch Count: 10 dtr, 2 FPtr, 49 Popcorns, 11 ch-1 sps, 4 ch-2 sps, and 46 ch-3 sps

Yay, you've finished the heart part of this motif. Now we just need to square-ish it.
